

Pripreme za tretman protiv krevetnih stenica

Preparations for bedbug treatment

- Pospremite, tako da lako možemo izvršiti inspekciju. Usisajte ili počistite pre nego što dođemo, **ali nemojte praviti veliko spremanje!**
- Tidy up, so we are able to make a good inspection. Vacuum or clean – **but don't overdo it!**

- Neka sav nameštaj ostane u sobi.
- Don't remove anything from the room.

- Skinite posteljinu i pripremite krevet za pregledanje.
- Strip the bed ready for inspection.

- Postavite krevet uspravno, na ivice.
- Lift the bed onto its edge.

- Odmaknite nameštaj od zidova.
- Move furniture from the wall.

- Potrebno je da pregledamo sve sobe.
- We need access to all rooms.

Važno je upamtiti:

- Ne ulazite u tretirane prostorije najmanje 2 sata.
- Deca mlađa od 2 godine ili osjetljive osobe ne bi trebalo da ulaze u tretirane prostorije 24 sata nakon tretmana.
- Ne čistite vodom i ne usisavajte sanirane površine 5–6 sedmica nakon tretmana.
- Izbegnite iznošenje i unošenje nameštaja, posteljine i drugih predmeta, dok ne damo odobrenje.

Important to remember:

- Do not enter treated rooms for at least 2 hours.
- Children under 2 or sensitive people are recommended not to enter treated rooms for the first 24 hours.
- Do not wet clean or vacuum for 5 - 6 weeks after the treatment.
- Do not remove or bring in furniture, bedding or other articles until we give the go ahead.

Postupanje sa tkaninama

- Pranje: Preko 60° C, čitajte savete za pranje da bi tkanine izdržale temperaturu.
- Zamrzavanje: -18° C tokom jedne sedmice.
- Toplota: Sušite stvari u mašini za sušenje oko 50 minuta.

Treating textiles

- Wash: Over 60° C, always check the label.
- Freezer: -18° C one week.
- Heat: Tumble dry for about 50 minutes.
